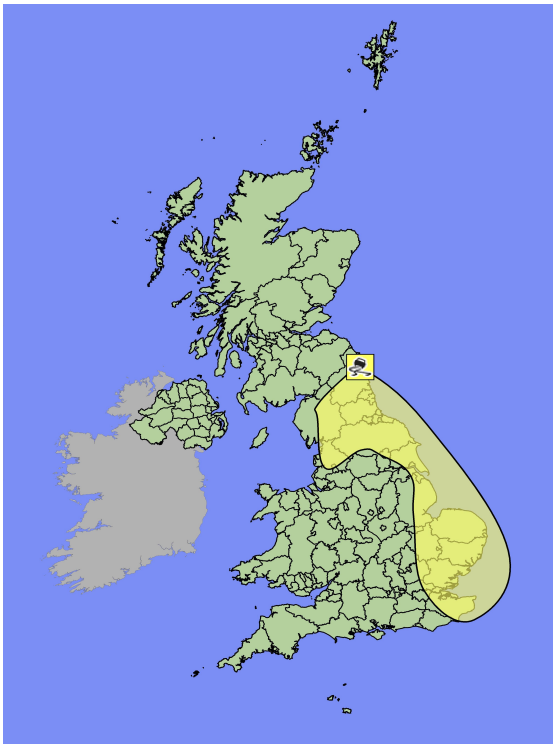
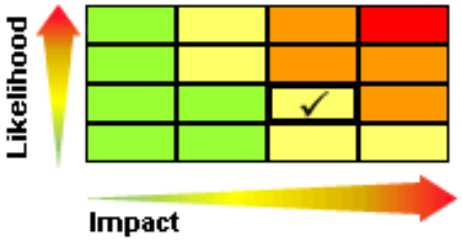
National Severe Weather Warning Service





Chief Forecasters Assessment
The cloud is expected to break overnight allowing temperatures to fall below freezing widely. Over northern and particularly northeast England, where the ground has been left wet following rain, sleet and snow, ice is expected to form widely on untreated surfaces. Across East Anglia and southeast England, icy patches are expected following scattered light snow flurries and where remaining snow cover that has partially melted, refreezes.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **18:00 on Thu, 09th Feb 2012** until **12:00 on Fri, 10th Feb 2012**

Icy stretches are expected to form on untreated surfaces on Thursday evening as temperatures fall below freezing again and will last overnight into Friday morning. These are expected to be most widespread across northeast England following a mixture of rain, sleet and snow on Thursday evening. The public should be aware that driving conditions could become hazardous.
